EDUCATION

Georgia Institute of Technology - College of Computing

August 2023 - May 2026

Bachelor of Science in Computer Science | GPA: 3.96/4.0 - Highest Honors

Atlanta, GA

Concentrations: Systems & Architecture and Information Internetworks

EXPERIENCE

Software Engineer - Anduril Industries

June 2026 - Present

Boston, MA

WaveLogic Software Engineering Intern - Ciena

January 2026 – May 2026

Modem Control Software

Alpharetta, GA

- Deployed an agentic AI bug-fix system in Python integrating Jira, Confluence, Bitbucket, and internal code review tools, reducing repetitive debugging effort by 80%
- Rolled out 20+ GUI enhancements and bug fixes for the WL6e EVK using PHP and JavaScript
- Programmed a PHP/JavaScript GUI and modem mapping visualization for the STOIC modem test kit, and implemented automated GUI startup during boot in C/C++

Software Engineering Intern - Capital One

June 2025 – August 2025

Technology Internship Program

McLean, VA

- Delivered automation solutions supporting container platform migration from ECS/Fargate to internal Kubernetes platform (Dragon), reducing onboarding time by 75%
- Developed a Go-based CLI adopted by 20+ teams, using AWS Lambda to automate required deployment pull requests on behalf of customers and provision compliant IAM roles
- Built a high-fidelity Go parser for legacy container configs, auto-generating production-ready Kubernetes manifests

Data Science and Analytics Intern - John Deere

May 2024 – July 2024

Intelligent Solutions Group

Urbandale, IA

- Developed patented machine learning algorithms in Python/PySpark using clustering and image segmentation to generate guidance zones from historical machine path data for AutoPath/AutoTrac autonomous guidance tools
- Spearheaded delivery of validation sets to multiple agricultural organizations (100,000+ acres), earning deployment approval in John Deere Operations Center with support for 650,000+ machines
- Built CNN architecture using satellite imagery and digital elevation model rasters to detect agricultural terraces

PROJECTS (SEE GITHUB/LINKEDIN)

MiniRedis | C/C++, Docker

- Engineered a high-performance, Redis-inspired in-memory key-value store in C++, containerized with Docker
- Implemented custom event loop using `poll()`, non-blocking I/O, and binary-safe protocol parsing
- Supported Redis-style pipelining and REPL interface, with efficient in-memory data structures (hash maps & lists)

Hope for Haiti Inventory Platform | Next.js, React, PostgreSQL, Prisma

- Engineered a high-volume CSV/XLSX ingestion pipeline with live previews, supporting 5,000+ record uploads
- Developed donor and registration portals in React/Tailwind, reducing administrative workflow time by 50%
- Built scalable REST APIs with Prisma ORM supporting search/filter across 100,000+ items valued at \$30M+

Computer Vision Geolocation - Advisor: Prof. Susan Fox, Macalester | Python, TensorFlow, OpenCV

- Architected a convolutional neural network using VGG16 and transfer learning to predict city location from images
- Enhanced prediction accuracy by optimizing image preprocessing and fine-tuning deep learning model architecture

TECHNICAL SKILLS

Languages: Python, C++, Java, Go, JavaScript, TypeScript, SQL, MATLAB, HTML/CSS, Bash, Assembly (x86)

Frameworks/Libraries: React, Next.js, Node.js, Flask, Spring Boot, Prisma, Tailwind, NumPy, Pandas, MongoDB

Developer Tools: Git, Docker, GitHub Actions, Supabase, Stripe, AWS, Azure, GCP, Kubernetes, Linux, Jenkins

Coursework: Data Structures & Algorithms, Operating Systems, Computer Networking, Advanced Computer Architecture, Processor Design, Compilers, Databases, Information Security, Artificial Intelligence, Object-Oriented Programming, Digital Design, Discrete Mathematics, Applied Combinatorics, Probability & Statistics

AWARDS/HONORS

Inventor on Patent: "Guidance Zones Based on Historical Machine Path Data" - Filed by John Deere

Georgia Tech Faculty Honors: Awarded for maintaining a perfect 4.0 GPA across 4 consecutive terms

Top 1% Globally – 2025 IMC Prosperity Trading Competition: Ranked in top 1% out of 13,500+ teams
